

SANA P N

B.TECH – COMPUTER SCIENCE ENGINEERING

Motivated and detail-oriented Computer Science Engineering student with a strong interest in Web Development, UI/UX Design, Cybersecurity, AI and Software Development. Passionate about building innovative solutions and continuously enhancing technical and problem-solving skills.

SKILLS

PROGRAMMING LANGUAGES

- Python
- Java
- C

WEB TECHNOLOGIES

- HTML5
- CSS3

DESIGN TOOLS

- Figma
- Canva

TOOLS & PLATFORMS

- PyCharm
- GitHub (Beginner)

AREAS OF INTEREST

- Web Development
- UI/UX Design
- Cybersecurity
- Artificial Intelligence (AI)
- Machine Learning
- Software Development

EDUCATION

B.Tech in Computer Science Engineering

SNM Institute of Management and Technology

CGPA: 7.75 | Expected Graduation: 2027

PROJECTS

Deepfake Audio Detection

Python | CNN | MFCC

- Developed a deepfake audio detection system using Convolutional Neural Networks (CNN) and Mel-Frequency Cepstral Coefficients (MFCC) for robust feature extraction.
- Trained and evaluated models to identify AI-generated and manipulated audio samples with improved accuracy.
- Focused on enhancing audio authenticity verification and classification performance.

Internship Finding Portal

HTML | CSS | Python

- Designed and developed a web-based platform to help students discover and apply for internship opportunities.
- Built an intuitive and user-friendly interface for seamless search and filtering of internships.
- Improved accessibility of internship-related information for students.

CERTIFICATIONS & TRAINING

AI Workshop
Stem Robotics

Python Web Development
Using AI
Techmaghi

Python Programming Internship
Stem Robotics

Web Designing and
Development
Teklearn

LANGUAGES

- English (Fluent)
- Malayalam (Native)
- Hindi (Basic Reading & Writing)
- Arabic (Basic Reading & Writing)

RELEVANT COURSEWORK

- Data Structures
- Database Management Systems
- Operating Systems
- Computer Networks
- Software Engineering
- Web Technologies
